

SIDE 1

Thank you for purchasing a Morley Product!

The Just Distortion is exactly what the name implies; Just Distortion. No bells, no whistles, just great distortion at a great price.

What, no knobs?!

We designed the pedal with a preset distortion setting. Great for all types of music and playing styles.

Hey! How do I power up the pedal?

The pedal was designed to be run off one 9 volt battery (not included). To install battery, press the left side of the cover and pull the lid up. The right side is hinged to the pedal so don't try to completely remove the entire battery door.

Is that it?

Yes. Now go plug in and play!

If only all your gear was this simple.

SIDE 2

This pedal is warranted for 90 days from date of purchase.

If pedal is not performing properly, check your set up (cables, hookup, etc..) and battery power.

If defective contact the store where purchased or your area Morley distributor for assistance.

Proof of purchase will be necessary to validate warranty. We cannot accept responsibility for damage occurring in shipment.
