

# Rock'n Verb

## INSTRUCTIONS

Mod-RNV

**MORLEY®**

A Division of Tel Ray Electronics Mfg. Co., Inc.  
Manufacturers of Electronic Sound  
Modification Products

The Morley Rock'n Verb is one of the finest devices in its class. A few moments of reading this pamphlet will provide a much shorter "learning curve" than you may be used with any other guitar effect pedal. The Rock'n Verb is designed to provide a wide range of overdrive effects. Always use good quality shielded cables to minimize interference noise, or hum. The RNV may be used with two 9 volt alkaline batteries, or with a 9 volt transformer AC (mains) adapter.

OPERATING INSTRUCTIONS

Connect the instrument or mixer to the input jack, and the output jack to the amplifier. Have your A.C. adapter plugged into a wall outlet. Turn the unit on. The user controls to the Rock'n Verb are: 1. The "MOD" switch. This switch is used to select the "effect" you wish to produce. The "effect" you wish to produce is selected by the "MOD" switch. 2. The "OVERDRIVE" knob. This knob is used to control the amount of overdrive. 3. The "EFFECTS ON" indicator. This indicator is used to indicate when the effect is on. 4. The "INPUT" and "OUTPUT" jacks. These jacks are used to connect the instrument or mixer to the unit, and the unit to the amplifier.

### WARRANTY

MORLEY BUILDS STATE OF THE ART PRODUCTS TO THE HIGHEST PROFESSIONAL STANDARDS OF QUALITY. THEREFORE, FOR ONE YEAR FROM THE DATE OF PURCHASE, MORLEY WARRANTS ITS PRODUCTS TO BE FREE FROM DEFECT TO THE ORIGINAL CONSUMER PURCHASER PROVIDED:

The RNV can operate from two 9 volt batteries or the Morley A.C. adapter. The adapter is by far the most economical. It battery operation is more convenient, the alkaline batteries, despite their higher initial cost, are more economical compared to the cheaper zinc carbon 9 volt.

The unit is turned on when a cord is plugged into the input jack. The batteries are automatically disconnected when the A.C. adapter is connected.
